ASSIGNMENT - 4

TEAM ID	PNT2022TMID27134
PROJECT NAME	SMART WASTE MANAGEMENT FOR METROPOLITANT CITIES
SUBMITTED BY	AINEESH GOLDA A
MARKS	2 Marks

QUESTION :

Write code and connections in wokwi for ultrasonic sensor. Whenever distance is less than 100 cms send "alert" to IBM cloud and display in device recent events.
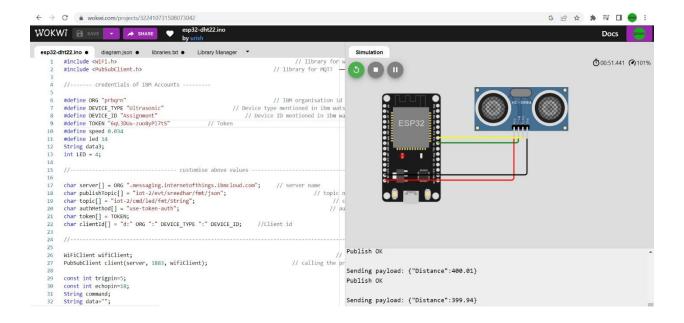

CODE :

```
#include <WiFi.h>                              // library for wifi
#include <PubSubClient.h>                      // library for MQTT

//------- credentials of IBM Accounts ---------

#define ORG "prbqrn"                           // IBM organisation id
#define DEVICE_TYPE "Ultrasonic"               // Device type mentioned in ibm watson iot platform
#define DEVICE_ID "Assignment"                 // Device ID mentioned in ibm watson iot platform

#define TOKEN "6qL3DUu-zuo8yPl7tS"             // Token
#define speed 0.034
#define led 14 String
data3;
int LED = 4;

//-------------------------------- customise above values ----------------------------------------------

char server[] = ORG ".messaging.internetofthings.ibmcloud.com";    // server name
char publishTopic[] = "iot-2/evt/sreedhar/fmt/json";               // topic name and type of event perform and format in which data
to be send
char topic[] = "iot-2/cmd/led/fmt/String";                         // cmd Represent type and command is test format of strings
char authMethod[] = "use-token-auth";                              // authentication method char token[] = TOKEN;
char clientId[] = "d:" ORG ":" DEVICE_TYPE ":" DEVICE_ID;    //Client id

//-----------------------------------------------------------------------------------------------------

WiFiClient wifiClient;                              // creating instance for wificlient
PubSubClient client(server, 1883, wifiClient);     // calling the predefined client id by passing parameter like server id,port
and wifi credential

     Serial.println("Publish FAILED");
   }

 }

 }
```

OUTPUT :

Code simulation on wokwi

Data sent to IBM Cloud with distance
